Demonstration of Proposed Features

Date	30 September 2026
Team ID	6ab3e94b6603573ccfb3c558
Project Name	Script-Controlled ACL – Restrict Record Access Based on Field Value
Maximum Marks	1 Mark

Demonstration of Proposed Features:

This document tracks the proposed features of the Script-Controlled ACL solution and records whether each feature is implemented and demonstrated.

S.No	Feature Name	Description	Status (Implemented / Partial / Pending)	Demonstrated (Yes / No)	Remarks
1	Field-Value Based Record Access	Restrict access to a record according to the value stored in a selected field.	Implemented	Yes	Core ACL requirement.
2	Script-Controlled Authorization	Use ACL script logic to evaluate the record field before granting access.	Implemented	Yes	Dynamic access validation.
3	Role / User Validation	Validate the logged-in user's role or authorization along with the field condition.	Implemented	Yes	Tested with different user scenarios.
4	Allow / Deny Access	Grant access when the condition is satisfied and deny it when the condition fails.	Implemented	Yes	Verified using positive and negative cases.
5	Test Different Field Values	Test access behavior for multiple record field values.	Implemented	Yes	Used controlled test records.
6	Security & Maintainability	Keep the access rule centralized and maintainable through ACL scripting.	Implemented	Yes	Supports controlled record access.

Feature Implementation Summary:

Total Features Proposed	6
Total Features Implemented	6
Total Features Demonstrated	6
Overall Implementation Rate (%)	100%
